---

PROFESSIONAL SUMMARY

Flutter Developer with 3.8 years of experience building high-performance Android & iOS apps using Flutter, Dart, Firebase (Authentication, Crashlytics), REST API, Riverpod, GetX, and BLoC. Skilled in MVVM, MVC & Clean Architecture, Hive, Shared Preferences, AWS EC2/S3, Git/GitLab, CI/CD, and deployment to Google Play Store & Apple App Store. Immediate joiner focused on delivering responsive, secure, and user-centric solutions.

TECHNICAL SKILLS

- Flutter
- Dart
- **State Management:** GetX, Riverpod, BLoC
- **Architectures:** MVC, MVVM, Clean Architecture
- **APIs & Networking:** RESTful API Integration
- **Firebase Services:** Firebase Authentication, Firebase Crashlytics
- **Version Control:** Git, GitHub, GitLab
- **CI/CD:** GitHub Actions
- **App Deployment:** Google Play Store, Apple App Store
- **Soft Skills:** Communication, Team Collaboration, Problem Solving, Quick Learner, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

Flutter Developer | Vrinda Techapps, Hyderabad | 09/2023 – Present

- Delivered **3 cross-platform apps** with seamless **REST API integration** and **Firebase Firestore**, improving customer retention through responsive UI & intuitive design.
- Reduced incident resolution time by **40%** through **Firebase Crashlytics** integration and proactive error monitoring.
- Improved design efficiency by **20%** by collaborating closely with UX/UI teams and providing early-stage technical feedback.
- Implemented **Hive** and **Shared Preferences** for local storage to enhance offline capabilities.
- Prioritized and delivered features within **Agile sprints**, ensuring alignment with project requirements and technical standards.

Software Developer | BitsSens Technologies, Hyderabad | Jan 2023 – Aug 2023

- Improved feature delivery speed by **30%** by creating reusable Flutter widgets with **GetX** state management.
- Reduced UI bugs by **25%** through implementation of **MVC architecture** and structured coding practices.
- Ensured smooth backend synchronization via **REST API** and JSON handling.
- Participated in peer code reviews, improving overall team code quality and knowledge sharing.

Associate Software Engineer | Tech Mahindra, Hyderabad | Jul 2021 – Aug 2022

- Developed responsive Flutter UI from **Figma** designs, optimizing widget structures for performance and scalability.
- Reduced API latency by **15%** via **REST API** optimization in collaboration with backend teams.
- Supported backend deployment using **AWS EC2 & S3**, ensuring scalable, secure infrastructure for high-volume traffic apps.

PROJECTS

Now Vision – Flutter, GetX, MVC & Clean Architecture

- Built end-to-end inspection and site reporting flows in Flutter using GetX, enabling real-time upload of images, panoramas, and location data directly from construction sites into the **Now Vision AI** platform.
- Created reusable components for forms, photo pickers, bottom sheets, and dashboards, which were reused across multiple modules, reducing development time by 30%.
- Optimized performance using GetX reactive state, lazy-loaded controllers, and clean layered architecture, resulting in smoother UI and faster load times on low-end devices.

Indipe Payment – Flutter, Kotlin, Platform Channels, BLoC, Clean Architecture

- Developed secure real-time payment transfers via **Flutter-Kotlin integration**.
- Created reusable payment modules integrated into multiple apps.
- Increased maintainability by **25%** using **BLoC architecture** and Clean Architecture principles

EZIT Guardian: Finance Advisor – Flutter, Riverpod, REST APIs, MVVM

- Delivered real-time nominee & asset tracking with enhanced data security.
- Improved data fetch success by **25%** via advanced error handling, retry logic, and offline caching using **Hive**.

Integra Global – Flutter, GetX, REST APIs, MVC

- Built renewable energy monitoring with **real-time analytics** via **SignalR**.
- Reduced data latency by **30%** through API optimization and efficient state management.

ACHIEVEMENTS

- Reduced app launch time by **25%** via widget optimization & lazy loading.
- Increased development efficiency by **20%** through reusable component creation.
- Maintained **100% on-time delivery** in Agile sprints.

EDUCATION

Bachelor of Engineering – Muffakham Jah College of Engineering and Technology, Hyderabad (2017–2020)
Diploma – Government Institute of Electronics, Hyderabad (2013–2016)
SSC – St. Duke's High School, Hyderabad (2013)
